

<https://dt.northwestradiology.com>

NWR offers access to common NWR applications through a secure internet accessible virtual desktop. The virtual desktop can be accessed from any Internet connected Windows PC, Mac, Chrome Book or iOS and Android devices.

When you access <https://dt.northwestradiology.com> you have the option to Install VMware Horizon Client or launch VMware Horizon HTML Access. For most users and situations VMware Horizon HTML Access is sufficient. With HTML access you do not need to install any software, you simply use your web browser. If HTML access does not work, you can install the Horizon Client.

To access the virtual desktop:

1. Go to <https://dt.northwestradiology.com>
2. Click VMware Horizon HTML Access*.

3. Enter your NWR username and password (*this is the same as you use for PACS*).
4. Click the desktop icon (i.e. VxR-Rads) to launch your desktop.

5. When you are done, sign out of your desktop.

6. Finally log out of VM Horizon.
